Get-Command

Démonstration 03 du module 1

L'objectif de cette démonstration est de vous présenter la commande Get-Command.

Déroulement

- Pour obtenir la liste de toutes les commandes disponibles, utiliser la Cmdlet `Get-Command`

```
PS C:\Users\STAG> Get-Command | fw -Column 5

Add-AppPackage       Add-AppPackageVolume Add-AppProvisione... Add-ProvisionedAp... Add-ProvisionedAp...
Add-ProvisioningP... Add-TrustedProvis... Apply-WindowsUnat... Disable-PhysicalD... Disable-StorageDi...
Dismount-AppPacka... Enable-PhysicalDi... Enable-StorageDia... Flush-Volume         Get-AppPackage
Get-AppPackageDef... Get-AppPackageLas... Get-AppPackageLog    Get-AppPackageMan... Get-AppPackageVolume
Get-AppProvisione... Get-DiskSNV          Get-PhysicalDiskSNV Get-ProvisionedAp... Get-ProvisionedAp...
Get-StorageEnclos... Initialize-Volume    Mount-AppPackageV... Move-AppPackage      Move-SmbClient
Optimize-AppProvi... Optimize-Provisio... Optimize-Provisio... Remove-AppPackage    Remove-AppPackage...
Remove-AppProvisi... Remove-EtwTraceSe... Remove-Provisione... Remove-Provisione... Remove-Provisioni...
Remove-TrustedPro... Set-AppPackageDef... Set-AppPackagePro... Set-AutologgerConfig Set-EtwTraceSession
Set-ProvisionedAp... Set-ProvisionedAp... Write-FileSystemC... A:                   Add-BCDataCacheEx...
Add-BitLockerKeyP... Add-DnsClientNrpt... Add-DtcClusterTMM... Add-EtwTraceProvider Add-InitiatorIdTo...
Add-MpPreference     Add-NetEventNetwo... Add-NetEventPacke... Add-NetEventProvider Add-NetEventVFPPr...
Add-NetEventVmNet... Add-NetEventVmSwitch Add-NetEventVmSwi... Add-NetEventWFPCa... Add-NetIPHttpsCer...
Add-NetLbfoTeamMe... Add-NetLbfoTeamNic   Add-NetNatExterna... Add-NetNatStaticM... Add-NetSwitchTeam...
Add-OdbcDsn          Add-PartitionAcce... Add-PhysicalDisk     Add-Printer          Add-PrinterDriver
Add-PrinterPort      Add-StorageFaultD... Add-TargetPortToM... Add-VirtualDiskTo... Add-VpnConnection
Add-VpnConnection... Add-VpnConnection... Add-VpnConnection... Add-VpnConnection... AfterAll
```

Le nombre de commandes disponible est très important. Nous avons ici un aperçu des commandes disponibles.

Afin de filtrer le résultat de sortie, utiliser le caractère `*` sur le paramètre `Name`.

```
PS C:\Users\STAG> Get-Command -Name *-service

CommandType     Name
-----------     ----
Cmdlet          Get-Service
Cmdlet          New-Service
Cmdlet          Restart-Service
Cmdlet          Resume-Service
Cmdlet          Set-Service
Cmdlet          Start-Service
Cmdlet          Stop-Service
Cmdlet          Suspend-Service
```

Pour filtrer les commandes sur le verbe d'action, utiliser le caractère * sur le paramètre `verb`.
